

All the right angles

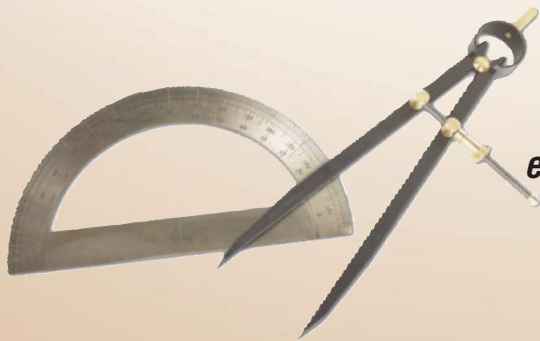

The **KnowledgePoints Geometry Program** gives your student all the tools needed to learn Geometry. In our comprehensive program, a student's success comes from learned, practiced, and mastered geometry skills. Our program helps to build a firm foundation for future success in algebra II, trigonometry and calculus applications.

Students are taught to follow logical steps for the mastery of each skill area. Our certified instructors work with your child to master abstract thinking, thereby eliminating fears through a simplified approach to solving geometry lessons.

The geometry skills and strategies taught in the **Geometry Program** include: lines and angles, reasoning and proof, triangles, quadrilaterals, circles, area and volume, to name a few.

The Geometry Program features:

- ★ Individualized instruction
- ★ A nationally renowned curriculum
- ★ A systematic approach
- ★ College readiness
- ★ Skills mastery focused
- ★ Caring/trained/motivating instructors
- ★ Confidence building
- ★ Building relationships and fostering communication with students, parents, and teachers

Our instructors take the time to explain geometry skills in unique, proven ways that enrich the student's ability and understanding. Your student will be glad YOU chose KnowledgePoints!
